

# TUITION REFUND INSURANCE

**Tuition Refund Insurance** is a way to protect both your school's accounts receivables, as well as the investment tuition payers make in their student's education.

A tuition payer's enrollment contract with a school financially obligates them to pay the full amount of tuition and fees for the student to attend school, regardless of withdrawal for any reason.

Withdrawals and dismissals don't always end on the best terms. In the event of a claim, Tuition Refund Insurance pays the covered portion of tuition directly to the school. This allows the school to clear the student's balance and not worry about collecting the outstanding money from the tuition payer. It also removes the financial burden of the outstanding tuition from the tuition payer, making it a better experience for both the school and tuition payer.
